

Professor Dr. Lokesh Joshi

Professor Lokesh Joshi is Vice President for Research at National University of Ireland Galway. Prof. Joshi's Office leads Research, Innovation and Entrepreneurship activities across the University.

Professor Joshi is also Science Foundation Ireland-Stokes Professor of Glycosciences and Director of the Advanced Glycoscience Research Cluster at NUI Galway. Prof Joshi's research focuses on the role of complex sugars in health and diseases. His group is working on developing novel technologies and solutions including disease-related biomarkers, identification of pathogens, commensal bacteria in the gut and the relationship between dietary components and gut health.

During his time at Arizona State University (ASU) he was Associate Professor in the Department of Bioengineering and Director of the Center for Glycoscience and Technologies in the Biodesign Institute. He completed Post-Doctoral and Research Associate training at Boyce Thompson Institute and Cornell University, Ithaca, New York and received a PhD from Bath University.
